Business Proposal

We are an international Team of young and ambitious engineers and people with other talents with more than 10 years of experience in engineering.

Our Portfolio includes more than 20 inventions with 10 patents.

Project description

The Know-how device can be made for any type of voltage output with frequency of 50-60Hz.

- 380V 3-phase 50-60Hz
- 220V 50-60Hz
- 110V 50-60Hz

Electromagnetic generator can be produced in 3kW power output.

If a larger power generator is needed, then 2 or more 10kW power generators can be connected and synchronized to produce 20kW or more.

Advantages:

1. Production cost will be cheaper than production of wind turbines or solar panels. Production cost of 1 kW will be 300-400 US \$.
2. Small size compare to other power generating systems with the same power output.
3. Special installation is not required.
4. Mobility. Can be easily moved to any location.

Proposal for a distributor

1. For cooperation with Infinity SAV signed a distribution agreement.
2. Infinity SAV Company undertakes within the specified time to provide a fully functional production unit of the Fossil Fuel Free Generator and third party verification of performance.
3. Distributor agrees to the day of submitting the Fossil Fuel Free Generator to pay a deposit amount of 100,000 US dollars.
4. Distributor agrees to open its new company with the name "Infinity SAV <country of distribution>" within the specified time.
5. The Distributor must have facilities for the holding of the presentation device. The company must include trained staff of engineers, operational specialists and sales managers.
6. The Infinity SAV company undertakes to provide all the necessary certificates and documentation for the products.

Terms of cooperation that we offer involve:

- The discount system for distributors is 30%.
- Subject to the signing of a distribution agreement, provided the allocation of the territory for the distributor.
- Full technical support and staff training.

Sincerely,
INFINITY SAV TEAM
